

Spectator Policy in the event of ground evacuation

Reviewed by Clive Wolstenholme STFC Secretary - 01/07/24

Spectators are allowed to stand behind the goal nearest to the club house and along the side of the pitch where the main stand is and their evacuation would be **via the double doors of the main entrance** where spectators arrive and pay their admission and **also the service gate** situated 20 metres from **the main entrance** on the club house side which is suitable for **vehicular exit/entry**. Other than the stand the area is grass standing.

For the players, team managements, match officials their evacuation from the changing rooms block would be **via a large gate entrance** five meters from the changing area. If the game was in progress then those in the two team dug outs could leave by **a single door to the school playing field** next door. **The exit door** is five metres from the front of the dug outs.

For those in **hospitality the exit is situated next** to the changing room block area and the **exit** is from the door entrance and out via the large gate entrance mentioned above.

A second route to safety for people in both the changing rooms block and hospitality would be through **the gates leading to the school** next to the ground or the gate taking them back to the pitch.
